

## BDM Hyperion Getting Started Check List

The following checklist will help you setup your computer environment for use with Hyperion.

- ✓ What operating system are you using on your computer?
  - XP
  - VISTA
  
- ✓ What version of Internet Explorer are you using on your computer?
  - IE v6
  - IE v7

Do not use IE 8 it has not been approved for use with Hyperion
  
- ✓ Once you have established the above, you will need to confirm/change your IE settings. The setup guides are found on the BDM homepage link:
  - <http://www.bdmhyperion.uconn.edu/Hyperiondocs.html>
  - **Internet Explorer 6 settings for XP**
  - **Internet Explorer 7 settings for XP and Vista**
  
- ✓ Are you are using IE v7?
  - Yes
  - No
  - If yes, you need to install a registry patched to your computer. The setup guide and link for this is found on the BDM homepage.
  - **Internet Explorer 7 Registry patch**  
Must be done on Vista, recommended for XP
  
- ✓ The **BDM Hyperion setup guide** is also found on the BDM homepage link. This guide includes instructions to:
  - Logon to Hyperion workspace using your netid and password
  - Open a document
  - Download the IR web client
